EMKS

EMKS, founded in 2015, is a Service-Disabled Veteran-Owned Small Business (SDVOSB) dedicated to instilling trust by delivering the highest quality solutions.

Core Capabilities

Health Services | Support critical mission requirements across the spectrum of care with Health IT support, Health A&AS, medical services, and specialized subject matter expertise in areas including Health Information Exchange (HIE) and Electronic Health Records (EHR), as well as Tactical & Expeditionary Medicine and Clinical Training.

IT Professional Services | Deliver a wide range of IT Professional Services, including seamless systems integration, innovative software development, and strategic IT consulting, designed to enhance and support our customers' operations and infrastructure, ensuring efficiency, security, and technological advancement.

Independent Testing / IV&V | Provide tailored testing services designed to get our clients' enterprise application projects up and running rapidly and efficiently, employing manual and automated test scripts, test data sets, tools, and templates designed for each environment.

Individual Expertise

Dr. Mike Sizemore, Chief Operating Officer for EMKS, is a globally recognized leader in medical operations with more than 20 years of experience at the nexus of healthcare delivery, military operations, and high-threat environments. For EMKS, Dr. Sizemore brings an unmatched ability to lead high-impact healthcare initiatives across diplomatic, military, and expeditionary domains.

He has directed large-scale medical operations serving over 5,000 personnel at the British, Norwegian, Dutch, and Canadian Embassies, in addition to managing remote clinics in geographically dispersed and austere environments. His operational strategies—rooted in LEAN principles—have driven measurable improvements in patient satisfaction, quality outcomes, and organizational profitability. His deep understanding of the global medical services landscape has also enabled EMKS and its partners to anticipate evolving market needs and attract top-tier clinical talent.

Dr. Sizemore's tactical expertise is equally robust. He has supported numerous contracts with Special Operations Consultants and the Global Operations Resources Group, providing medical leadership in complex, ambiguous, and high-risk settings. He also served as a dual-role medical provider and private security operator on Unexploded Ordnance (UXO) projects in Camp Wolf, Bayji, and Mosul, Iraq, in partnership with the Army Corps of Engineers. His experience includes high-profile protective details for High Value Targets (HVTs) and direct support of Foreign Internal Defense (FID) missions for Multi-National Forces – Iraq (MNF-I).

Internationally, Dr. Sizemore partnered with Kabul Medical University to develop and implement a clinical training program focused on care coordination and practitioner readiness. He has also worked with African governments to deliver medical training and support for forces operating in the Middle East and provided advisory support to Mobile Training Teams tasked with stabilizing Iraq's military and civil infrastructure.
